## INCREASE OF PUBLIC DEBT LIMIT

---

MAY 13, 1983.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

---

Mr. ROSTENKOWSKI, from the Committee on Ways and Means, submitted the following

### REPORT

[To accompany H.R. 2990]

The Committee on Ways and Means, to whom was referred the bill (H.R. 2990) to increase the temporary public debt limit, and for other purposes, having considered the same, report favorably thereon with amendments and recommend that the bill as amended do pass.

The amendments are as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

#### SECTION 1. INCREASE IN PUBLIC DEBT LIMIT.

(a) GENERAL RULE.—Subsection (b) of section 3101 of title 31, United States Code, is amended by striking out “\$400,000,000,000” and inserting in lieu thereof “\$1,389,000,000,000”.

(b) REPEAL OF TEMPORARY INCREASE.—Effective on the date of the enactment of this Act, the first section of the Act of September 30, 1982, entitled “Joint resolution to provide for a temporary increase in the public debt limit” (Public Law 97-270) is hereby repealed.

#### SEC. 2. INCREASE IN LIMIT ON LONG-TERM BONDS.

Subsection (a) of section 3102 of title 31, United States Code, is amended by striking out “\$110,000,000,000” and inserting in lieu thereof “\$150,000,000,000”.

Amend the title of the bill so as to read:

A bill to increase the permanent public debt limit, and for other purposes.

### I. SUMMARY

H.R. 2990 provides that the public debt limit will be increased to \$1,389 billion. The bill increases the debt limit by \$98.8 billion over the present law limit of \$1,290.2 billion. H. Con. Res. 91, the House-passed budget resolution, recommends that the public debt limit be increased to the level specified in H.R. 2990.

As amended by the Committee on Ways and Means, the bill would eliminate the distinction between the permanent and temporary debt limit. The \$1,389 billion limit would thus be a permanent ceiling that could be modified only by future legislation.

In addition, the committee approved an increase of \$40 billion in the authority for the Treasury to issue bonds bearing interest rates above 4¼ percent. The increase will raise to \$150 billion the limit on the amount of bonds that may be issued to the public under the exception.

## II. EXPLANATION OF PROVISIONS

### A. Increase in the Limit on the Public Debt

#### *Present Law*

The combined permanent and temporary debt limit is \$1,290.2 billion, which is in effect through September 30, 1983. This limit is the combination of the permanent debt limit of \$400 billion, which has no expiration date, and the temporary debt limit of \$890.2 billion, which will expire after September 30, 1983.

#### *Reasons for Change*

The outstanding public debt was \$1,256.3 billion at the close of business on May 9, 1983. The Treasury Department estimates that the current debt limit will be sufficient to meet the financing needs of the Federal Government only through May 31, 1983.

#### *May financing needs*

The Treasury Department announced plans to raise an additional \$9.8 billion this month as part of its quarterly financing plan. In addition, about \$23 billion will be transferred from the general fund to the OASDI and HI trust funds on May 20, 1983, in payment of noncontributory military wage credits, as required by the Social Security Act Amendments of 1983. The funds will be invested immediately in special issues of Federal debt, and the investment will increase by that amount the public debt subject to limit. The Social Security Act Amendments of 1983 also require that estimated re-

ceipts of the trust funds for each month be invested in Federal securities on the first day of each month. This provision becomes effective on June 1, 1983. June receipts are estimated at \$16 billion. Until now, social security trust funds receipts were invested at intervals during the month as received or on the last day of the month.

### *Recommended public debt levels*

The House-passed budget resolution, H. Con. Res. 91, recommended that the appropriate level of the public debt limit is \$1,389.2 billion for fiscal year 1983.

In testimony before the Committee on Ways and Means, the Administration testified that the public debt level necessary to meet financial requirements under present law through September 30, 1983, is \$1,388.2 billion. This level of debt assumes a constant operating cash balance at \$20 billion. The Treasury Department usually requests an additional \$5 billion in debt limit as an allowance for contingencies, which would increase the desired debt limit to \$1,393 billion. In testimony before the committee, the Treasury Department indicated that the full \$5 billion allowance for contingencies could be foregone in view of the short period between now and the end of the fiscal year.

TABLE 2.—ADMINISTRATION ESTIMATE OF PUBLIC DEBT SUBJECT TO LIMITATION,<sup>1</sup> FISCAL YEAR 1983

September 30....	20.0	1,388.2	1,388.2	1,393.2

<sup>1</sup> Based on estimates of budget receipts of \$598 billion, budget outlays of \$808 billion, unified budget deficit \$210 billion, and off-budget outlays of \$17 billion.

Source: Treasury Department.

Table 2 presents Treasury Department estimates of its public debt limit requirements on the last working day of each month remaining in this fiscal year and shows the end of fiscal year 1983 requirements for \$1,388.2 billion, without an allowance for contingencies.

### *Explanation of Provision*

#### *Increase in public debt limit*

The Committee on Ways and Means approved the increase in public debt limit proposed in H.R. 2990 to \$1,389 billion. As amended by the committee, the bill would eliminate the distinction between the permanent and temporary debt limit. The \$1,389 billion limit would thus be a permanent ceiling that could be modified only by future legislation.

Recommendations in the House budget resolution (H. Con. Res. 91) and the Administration's testimony that the present debt limit be increased to \$1,389 billion to accommodate financing needs through September 30, 1983, were sufficiently persuasive of the need to set the public debt limit at that level.

The committee recognized the need to approve an increase in the public debt limit before the end of this month because of the net increase of about \$10 billion in borrowing from the public this month, the \$23 billion transfer of noncontributory military wage credits on May 20, and the investment in Federal securities on June 1 of estimated social security trust funds receipts of \$16 billion for June 1983.

#### *Permanent debt limit*

In 1956, Congress enacted a permanent debt limit of \$275 billion. That level was \$25 billion below the \$300 billion limit that was approved in 1945. Subsequent increases in the public debt limit were enacted for temporary periods, obviously in the belief that historical precedents established a reasonable expectation that the public debt could decline to the permanent level.

By 1971, Congress believed that any success in controlling the growth of the public debt was not likely to be reflected in a decrease in the level to \$275 billion, and it enacted a new permanent level for the public debt limit at \$400 billion. Since then, all increases in the public debt limit have been temporary increases for a limited time period. The debt limit approved by the committee in this bill is 2½ times greater than the \$400 billion permanent limit.

Many Members of Congress believed that by retaining a temporary public debt limit, it would be possible to limit effectively the growth in government activity. That reasoning motivated Congress to continue the \$400 billion limit for more than a decade, even though there were annual budgetary deficits and the public debt level continued to increase because of budget deficits and financing off-budget agencies.

Use of the combined permanent and temporary public debt limits complicated both debt management and congressional procedure. If an increase of the temporary debt limit were not enacted before expiration of the current limit, the authorized debt limit would fall to the substantially lower permanent debt limit, and no debt could be

issued lawfully until Congress acted on the debt limit. As a result, the Federal Government would be able to meet its obligations only to the extent that the inflow of receipts and the operating cash balance provided sufficient funds for doing so. The Treasury Department, in anticipation of this difficulty, would issue warnings that savings bonds sales might be discontinued, and it also would revise the timing and amounts of money market transactions in order to prevent issuing unauthorized debt. As a result, the Treasury Department also would be unable even to refund maturing debt. Congress would feel that the urgent need to avoid the threat of default would preclude debate about the underlying fiscal problems and normal legislative procedures often would be rushed or truncated in order to enact a timely increase in the debt limit.

The committee concluded that the distinction between the \$400 billion permanent debt limit and a temporary ceiling that is periodically revised has outlived whatever usefulness it may have had. The distinction also has become a source of confusion to the public. Therefore, the committee amended the bill and approved the increased public debt limit as a permanent level of the public debt and recommended repeal of the temporary limit.

## **B. Increased Exception From 4¼ Percent Limit on Interest Rate**

### *Present Law*

Obligations of the United States are defined as bonds if they have a maturity when issued that is longer than 10 years. The rate of interest that may be paid on a bond may not exceed 4¼ percent, except that up to \$110 billion in outstanding bonds with rates of interest above 4¼ percent may be issued to the public. The exception for a specified amount of bonds—initially \$10 billion—was enacted in 1971, and it applied to all bonds with rates above the ceiling. An amendment in 1973 applied the limitation only to bonds held by the public, i.e., holdings of Federal agencies and the Federal Reserve Banks were not included.

### *Reasons for Change*

The Treasury Department presently has used about \$90 billion of this authority to issue bonds with interest rates above 4¼ percent. The remaining authority is expected to be used up with bond issues through the rest of 1983 or early in 1984.

The Treasury Department usually requests additions to this bond authority when it seeks needed increases in the public debt limit. It has requested an additional \$40 billion in authority at this time so that it may plan the amount and timing of bond issues for the next several quarters. In addition, participants in the money market also would be able to do longer-run planning. The ability to plan sales and purchases of the bonds reasonably far into the future can contribute to a more stable money market and lower borrowing costs.

The Treasury Department also believes that it must continue to issue bonds to continue a presence in all maturity sectors of the bond market and to resist shortening the maturity of the public debt. About half of the privately held marketable debt matures in

one year and two-thirds within 2 years. The average maturity presently is 3 years and 10 months.

***Explanation of Provision***

The bill increases the exception from the interest rate ceiling by \$40 billion, thus raising the exception to \$150 billion. The Treasury Department will be able to continue to operate in the long-term bond market through 1984 with its current scheduling for long-term bonds.

#### **IV. COSTS OF CARRYING OUT THE BILL AND VOTE OF THE COMMITTEE IN REPORTING THE BILL**

##### ***Budget Effects***

In compliance with clause 7 of Rule XIII of the Rules of the House of Representatives, the following statement is made relative to the effect on the revenues of H.R. 2990, as reported.

The committee does not believe that the changes made by this bill in the debt limit will result in any costs, either in the current fiscal year or in any of the 5 fiscal years following that year. The changes in debt management authority also should not raise costs and, in the long run, may reduce debt management costs.

The Treasury Department agrees with this statement.

##### ***Committee Vote***

In compliance with clause 2(1)(2)(B) of Rule XI of the Rules of the House of Representatives, the following statement is made relative to the vote by the committee on the motion to report the bill. The bill, as amended, was ordered favorably reported by a vote of 26 in favor and 2 opposed.

## V. CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of Rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

### TITLE 31, UNITED STATES CODE

\* \* \* \* \*

#### SUBTITLE III—FINANCIAL MANAGEMENT

\* \* \* \* \*

#### CHAPTER 31—PUBLIC DEBT

\* \* \* \* \*

#### SUBCHAPTER I—BORROWING AUTHORITY

##### § 3101. Public debt limit

(a) In this section, the current redemption value of an obligation issued on a discount basis and redeemable before maturity at the option of its holder is deemed to be the face amount of the obligation.

(b) The face amount of obligations issued under this chapter and the face amount of obligations whose principal and interest are guaranteed by the United States Government (except guaranteed obligations held by the Secretary of the Treasury) may not be more than **[\$400,000,000,000]** *\$1,389,000,000,000* outstanding at one time, subject to changes periodically made in that amount as provided by law through the congressional budget process described in Rule XLIX of the Rules of the House of Representatives or otherwise.

(c) The face amount of beneficial interests and participations (except those held by their issuer) issued under section 302(c) of the National Housing Act (12 U.S.C. 1717(c)) from July 1, 1967, through June 30, 1968, and outstanding at any time shall be included in the amount taken into account in deciding whether the face amount requirement of subsection (b) of this section has been exceeded. This subsection does not require a change in the budgetary accounting for beneficial interests and participations.

**§3102. Bonds**

(a) With the approval of the President, the Secretary of the Treasury may borrow on the credit of the United States Government amounts necessary for expenditures authorized by law and may issue bonds of the Government for the amounts borrowed and may buy, redeem, and make refunds under section 311 of this title. The Secretary may issue bonds authorized by this section to the public and to Government accounts at any annual interest rate and prescribe conditions under section 3121 of this title. However, the face amount of bonds issued under this section and held by the public with interest rates of more than 4.25 percent a year may not be more than **[\$110,000,000,000] \$150,000,000,000.**

**ACT OF SEPTEMBER 30, 1982**

Joint Resolution To Provide for a Temporary Increase in the Public Debt Limit

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* **[That during the period beginning on October 1, 1982, and ending on September 30, 1983, the public debt limit set forth in the first sentence of section 21 of the Second Liberty Bond Act (31 U.S.C. 757b) shall be temporarily increased by \$890,200,000,000 (and any other provision of law providing for a temporary increase in such limit shall not apply).]**

## **VI. OTHER MATTERS REQUIRED TO BE DISCUSSED UNDER HOUSE RULES**

In compliance with clauses 2(1)(3) and 2(1)(4) of Rule XI of the Rules of the House of Representatives, the following statements are made with respect to committee's action on H.R. 2990, as reported.

### ***Oversight Findings***

With regard to subdivision (A) of clause (2)(3), the committee advises that its hearings led to the conclusion that an increase in the public debt limit is required at the present time because the statutory temporary limitation in present law will be insufficient after May 31, 1983 to refund outstanding debt as it matures and to make payments for authorized government operations from the general fund in the Treasury Department. The change in the amount of bond authority is need to allow the Treasury Department to continue a long-run position in the bond market. The committee held a public hearing on May 12, 1983, relating to the proposed increase in the public debt limit and the amount of bonds that may be issued under the exception to the interest limitation.

### ***New Budget Authority and Tax Expenditures***

In compliance with subdivision (B) of clause 2(1)(3), the committee states that the changes made by the bill provide no new budget authority and no new increased tax expenditures.

### ***Consultation with Congressional Budget Office on Budget Estimates***

With respect to subdivision (C) of clause 2(1)(3), the committee advises that no estimate or comparison has been prepared by the Director of the Congressional Budget Office relative to any of the provisions of H.R. 2990.

### ***Oversight by Committee on Government Relations***

With respect to subdivision (D) of clause 2(1)(3), the committee advises that no oversight findings or recommendations have been submitted to the committee by the Committee on Government Operations regarding the subject matter of the committee bill.

### ***Inflationary Impact***

In compliance with clause 2(1)(4) of Rule XI, the committee states that the debt limitation and debt management changes are not expected to have an inflationary impact on prices and in costs in the operation of the national economy.
