For guaranteed loans financed by the Bank and treated as direct loans by a Federal agency pursuant to section 406(b), any fee or interest surcharge (the amount by which the interest rate charged exceeds the rate determined pursuant to section 502(5)(E)) that the Bank charges to a private borrower pursuant to section 6(c) of the Federal Financing Bank Act of 1973 shall be considered a cash flow to the Government for the purposes of determining the cost of the direct loan pursuant to section 502(5). All such amounts shall be credited to the appropriate financing account. **EXPLANATORY STATEMENT OF MANAGERS  
(H. CONF. REPT. 105-217)**

*18. Amendments to Title V of the Congressional Budget Act (Credit Reform)*

HOUSE BILL

No provision.

SENATE AMENDMENT (SECTION 1612)

The Senate amendment contains technical corrections and conforming amendments to the Federal Credit Reform Act of 1990. All of the proposed changes to Credit Reform in this amendment are taken from suggestions made by OMB. In general they reflect the experience with implementing Credit Reform since 1990 and codify current working definitions used by the Congressional Budget Office and the Office of Management and Budget.

The amendments to section 502 clarify the definition of a direct loan by explicitly including the sale of assets on credit terms. These amendments also clarify the law to reflect current practice concerning the treatment of modifications of outstanding direct loans and loan guarantees that affect their cost, adding a definition of the term 'modification.'

The amendments to section 504 clarify that appropriation action is required before direct loans and loan guarantees can be made (subsidy costs must be appropriated in advance), except for mandatory programs that are exempt from this requirement. The existing language with respect to modifications is also made clearer.

The amendments to section 505 provide technical instructions concerning the interest rate charged to Government agencies by Treasury to finance credit programs, including the interest rate charged on loans financed by the Federal Financing Bank (FFB). The amendments require Treasury, including the FFB, to use the same rate as the one used to calculate the cost of a direct loan or loan guarantee. That is the current practice for Treasury financing other than financing by the FFB. The FFB is permitted to add a surcharge to the Treasury rate of interest, which is paid by the borrower and, in turn, by the agency. Current law does not provide instructions for dealing with the surcharge. The amendments specify that the surcharge will be credited to the credit program's financing account along with other interest paid to the Government. Currently, a fraction of the surcharge is used to finance the FFB's administrative expenses. The amendments allow the FFB to require reimbursement from an agency to cover the FFB's administrative expenses. The agency will pay for its administrative expenses out of appropriations for that purpose, as is required now for other administrative expenses of most credit programs.

CONFERENCE AGREEMENT (SECTION 10117)

The Conference agreement adopts the Senate Amendment with additional changes for clarification.

Amendments to section 502 clarify the definition of the term 'cost,' including a modification of the requirement concerning the 'discount rate' used to determine cost so that it is based on the timing of the cash flows, as opposed to the term of the loan. Under this approach, a claim payment that will occur in year 1 of a guaranteed loan is discounted using the rate on a 1-year Treasury security, while a claim payment that will occur in year 30 is discounted using the rate on a 30-year Treasury security. The total cost is the sum of the present values of each year's cash flows over the life of the direct loan or loan guarantee. This change increases accuracy and reduces bias. Accuracy is improved because each cash flow is discounted by the interest rate on a Treasury security having the same maturity as the period of that cash flow. Under the present practice, the rate on a Treasury security of similar maturity to the loan is based on the pattern of interest and principal payments for the security (semi-annual interest payments and full principal repayment on the last payment date). The estimated cash flows for credit programs almost never match this pattern. Bias is reduced because loans with the same cash flows but different maturities would be priced using the same basket of discount rates, and would therefore have the same cost.

Also under the definition of 'cost,' the amendments requires that, for purposes of an agency obligating funds for the cost of a credit program, the cost estimate will be based on the assumptions used in the President's budget for the fiscal year in which the direct loan or loan guarantee is obligated, adjusted for differences between the projected and actual terms of the contract. For example, assuming no difference between the projected and actual terms of the loan contract, the cost estimate for the obligation of a direct loan in 1998 would be based on the assumptions used in the President's 1998 budget. This incorporates by statute OMB's current guidelines for calculating the cost estimate when funds are obligated for a direct loan or loan guarantee. For one-year funds, it provides Congress with the assurance that loan volume will not be affected by changes in assumptions during the period of program execution. In effect, it means that Congress will get the volume it paid for when it appropriated funds for the credit program. For programs with multi-year funds, the cost estimate will reflect more recent assumptions.

Workouts are not assumed to be included in the definition of modifications. The conference agreement does not change the treatment of workouts as implemented under the Federal Credit Reform Act of 1990. OMB and CBO shall report recommendations for any changes in such treatment to the House and Senate Committees on the Budget not later than March 30, 1998. Such report shall

include data on the extent of the use of workouts and the resulting costs or savings.

The amendments add a definition of the term ‘current,’ which is used in other credit definitions with regard to credit assumptions. By referring to GRH, the definition is the same as the one that is used for Budget Enforcement Act purposes.
